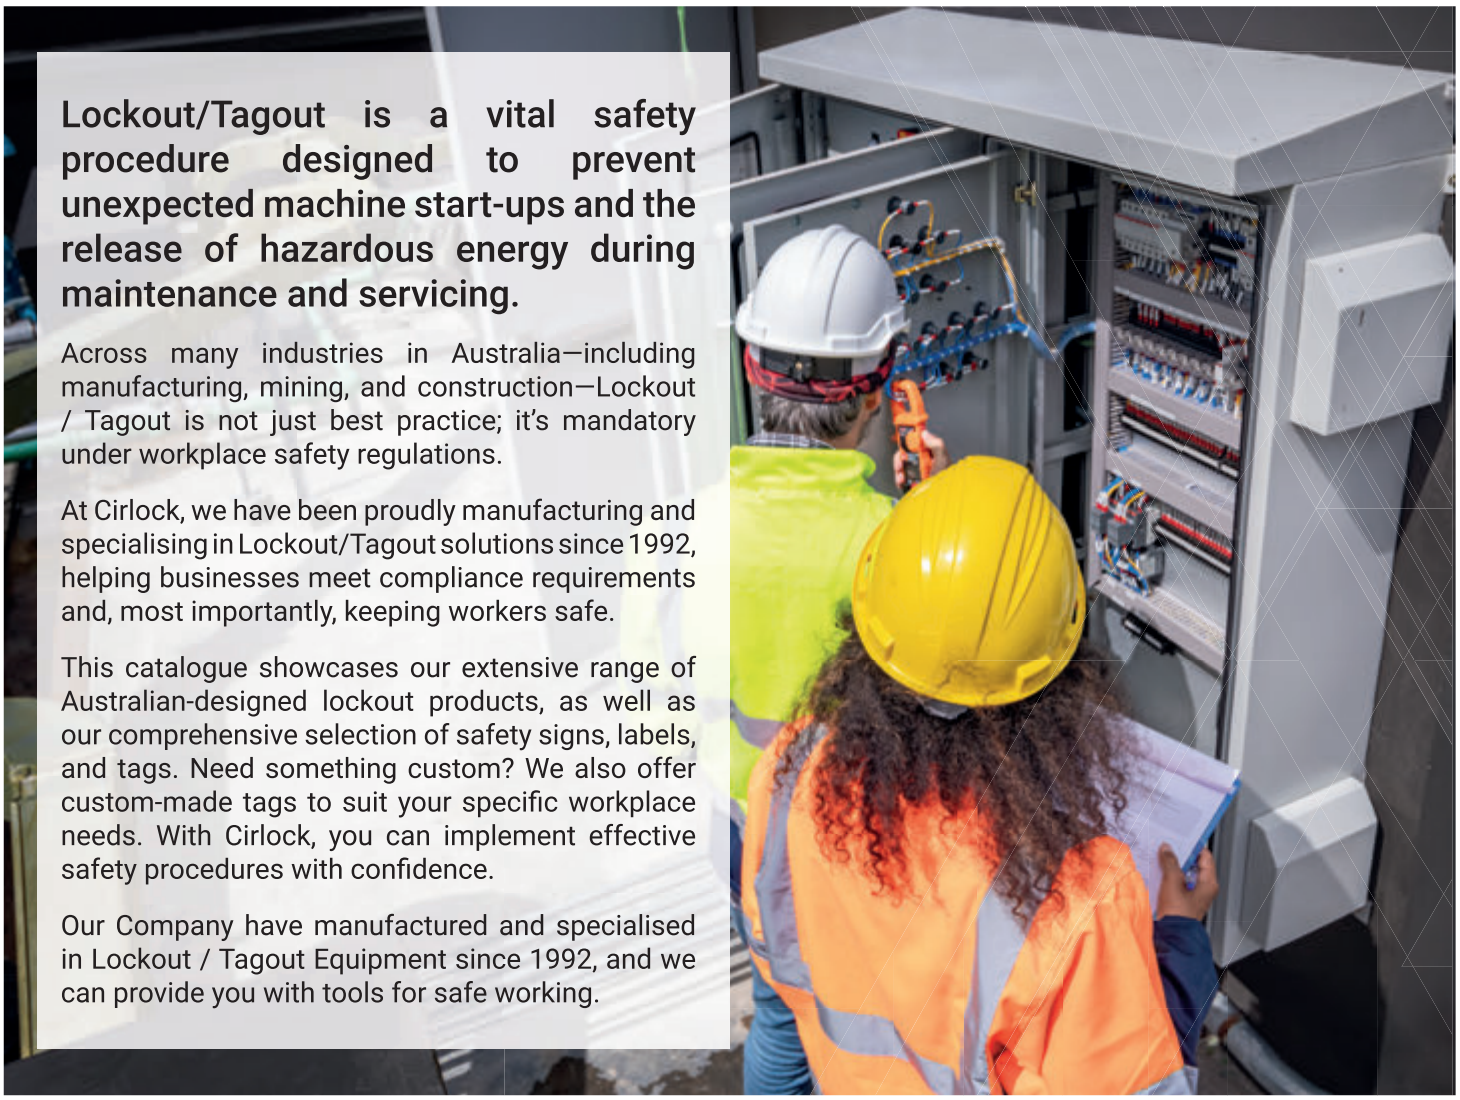
ABOUT LOCKOUT / TAGOUT



Lockout/Tagout is a vital safety procedure designed to prevent unexpected machine start-ups and the release of hazardous energy during maintenance and servicing.

Across many industries in Australia—including manufacturing, mining, and construction—Lockout / Tagout is not just best practice; it's mandatory under workplace safety regulations.

At Cirlock, we have been proudly manufacturing and specialising in Lockout/Tagout solutions since 1992, helping businesses meet compliance requirements and, most importantly, keeping workers safe.

This catalogue showcases our extensive range of Australian-designed lockout products, as well as our comprehensive selection of safety signs, labels, and tags. Need something custom? We also offer custom-made tags to suit your specific workplace needs. With Cirlock, you can implement effective safety procedures with confidence.

Our Company have manufactured and specialised in Lockout / Tagout Equipment since 1992, and we can provide you with tools for safe working.

TOGETHER WE CAN FIND THE BEST LOCKOUT SOLUTION FOR YOU

CIRCUIT BREAKER LOCKOUT DEVICES

Circuit breaker lockouts are devices which are placed on a breaker toggle in the off postion, which allows the placement of a padlock to prevent anyone other than the user to turn it back on.

We have a wide range of Circuit Breaker Lockout devices available for most types of Circuit Breakers.
Most are removable, meaning you can carry them with you in your tool bag (or Lockout Kit), but we also have an option which is fixed permamently to the cover plate/escutcheon.

All devices are easy to use - No-Tool/Clamp on options available

Circuit Breaker Toggle Lockout

- Suitable for Schneider and Merlin Gerin Moulded Case CB's
- Large Side for NS80, NSX100-250, NSE75-100, NSF150-250
- Small side for NS/NSX400-630, NSJ 400-600
- Made from powdercoated mild steel
- 3 padlock holes suitable for padlocks with up to 6.5mm shackle diameter

Part No.	Description
CBL-3	Circuit Breaker Toggle Lockout - Pack of 2

CBL-3

Lockout for NS and NSX style breakers

- Securely lock your NS and NSX style breakers in the OFF position only
- Device screws to face of breaker using existing screw holes
- Locks in the OFF position only

Part No.	Description
SALD-X-2	Circuit Breaker Lockout for NS and NSX Style

SALD-X-2

Moulded Case CB's (MCCB's) Lockout Devices cont..

Circuit Breaker Lockout

- Permanently mounted to escutcheon plate/cover
- Suitable for most large circuit breakers (universal type)
- Made from strong ABS plastics
- Includes 5mm spacer disc - arm length 126mm
- Suitable for padlocks with up to 6.5mm shackle diameter

Part No.	Description
CBL-1	Large Circuit Breaker Lockout - Single Pack

CBL-1

No Tool lockout for Extra Large MCCB's

- No Tools required

Suitable for toggles:
- up to 75mm wide
- up to 17mm thick

Minimum toggle size it can clamp is 15mm long.

Part No.	Description
UCL-9	Extra Large MCCB Lockout - Single Pack

UCL-9

No Tool lockout for Extra Large MCCB's (3 padlock holes)

Can accommodate up to 3 padlocks on round handle for group isolation.

Suitable for toggles:
- up to 75mm wide
- up to 17mm thick

Minimum toggle size it can clamp is 15mm long.

Part No.	Description
UCL-10	Extra Large MCCB Lockout - Single Pack

UCL-10

Complete Lockout for Circuit Breaker - Permanently Mounted

- Ideal for situations where lockout of individual breakers is required.
- Moulded from Re-Inforced Nylon
- Fitted to Circuit Breaker Cover
- See also page 50 for other types

Part No.	Description
SPLD-MCB-GREY OR YELLOW	Lockout Device for Miniature Circuit Breakers 18 x 45mm DIN C/B's - includes 2 arms use best fitting one. Grey or Yellow
SPLD-LCB-GREY OR YELLOW	Lockout Device for Moulded Case Circuit Breakers - includes 3 arms, use best fitting one. Grey or Yellow

SPLD-MCB & SPLD-LCB

Padlock not included

Clamp On Lockout Device

UCL-13 suitable for toggles up to 14mm wide and 12mm thick

Group Isolation

Group Isolation:
When multiple people need to work on the same piece of equipment a Group Lock Box is often used.

The keys to the machines isolation points are placed inside the box. Each individual worker places their personal lock on the outside of the box preventing access to the machinery isolation keys until all work has been completed and all padlocks are removed.

Look for the Australian Made symbol, these group lock boxes proudly designed and made in Australia by Cirlock.

Safety Lockout padlocks help to protect workers from hazards during maintenance. Cirlocks range of high quality lockout padlocks feature a secure 6 pin key way and a durable moulded single piece body (meaning twisting it won't break the body).
Locks are supplied with 1 key as standard to meet Australian best practice for Lockout / Tagout (Personal Safety Padlocks).

Registered or Non-Registered

Our padlocks are supplied Individually keyed as standard. All locks can be **Keyed Alike** (1 key can open several locks) and **Master Keyed** (1 Master Key can open several different locks, keyed individually or keyed alike), except the SLP-150 range. There are 2 options for Keying Alike - Registered or Non-Registered:

Registered: The special keying is done by our locksmith when required. The padlock and key is engraved with a unique number. At a later stage should additional locks or keys be required for the set, simply quote the number on the existing lock or key.

Non-Registered: These sets of Keyed Alike locks are more economical than our Registered locks as we get them keyed in bulk at our factory, kept in stock for immediate dispatch. You cannot add extra locks or keys to these sets once purchased. For available Non-Registered lock sets please see page 18.

CIRLOCK SYSTEM™ - ALUMINIUM

- Unique system - Made in Australia and trusted since 1992
- Available for most types of Circuit Breakers
- EASY ORDERING - Send us a photo (or a sketch) of the Distribution Board and we will return details and prices on what's required

APPLICATION:

The CIRLOCK System is a unique system of Lockout Devices for circuit breakers which can, when properly installed and used, help to prevent unintended energization of electrical circuits. It is permanently mounted to the escutcheon plate or cover.

The system consists of two parts:
1 - **MOUNTING SET** To be attached to the circuit breakers escutcheon plate or cover, preferably in full length of the cut-out made for the circuit breakers.
2 - **LOCKOUT ARMS** One arm is required for each circuit breaker. They are threaded onto supplied rod and inserted into the slots in the above Mounting Set during installation, or later.

Different brands and types of circuit breakers vary in pole size and width, so Mounting Sets and Lockout Arms must be ordered specifically to fit the brand and model of Circuit Breakers in use.
See pages 47 and 48 for details

4 THINGS YOU NEED TO KNOW BEFORE ORDERING A COMPLETE CIRLOCK SYSTEM

1. Circuit Breaker Type/Model
2. Number of breakers in the board
3. Size of breaker eg 18, 9, 27, 25mm pitch (standard MCB's are 18mm)
4. Number of poles on board eg 12, 24, 48 etc and how they are configured eg 1 row of 24 or 2 rows of 12 (2 x 12 = 24 pole board)

SCENARIO: A 24 pole board with 18mm wide modules - it has 2 rows of 12 with a total of 13 x Terasaki DIN-T circuit breakers (a mix of single and double pole)
WHAT YOU NEED TO ORDER:
2 x Mounting Sets - MAM-12 (18mm wide pitch)
13 x Lockout Arm - ALA-M-1 (suitable for the Terasaki Din-T type CB)

Lockout Arms can also be installed for 'spare' poles now or later.

For **part numbers on the Mounting Sets and Lockout Arms** to fit the different types of Circuit Breakers see pages 47 & 48.

MATERIAL
The CIRLOCK System is made in Australia from Clear Anodised Aluminium, moulded Plastic End Brackets and Coated Steel Hinge Rods.

Highest point over Distr. Boards escutcheon plate - without use of spacers: **20mm**
Except: Highest point over Distr. Board for UMAP - 12mm and UMAVE - 6mm
Spacers - if used - are **3mm** thick each
Holes provided for fastening are **4.2mm** - supplied screws and nuts are size M3 (3mm dia x 12mm length)
Holes for Padlocks are standard **7mm**. Larger holes (max 9mm) can be provided on request.

MAW-x x = No. of poles	**Westinghouse FB/F Frame Series, Cutler-Hammer F/FW/Fi/Ji Series, Terasaki Tem-break 160/250Amp series, LG GBH/GBN 250 Series, Merlin Gerin NS100/NS160/ NS250 Series** and others with 35mm pole width
MAE-x x = No. of poles	**Westinghouse E-Frame (Older Type)** and others with 38mm pole width
	1.2 metre Mounting Set Pack (1200 mm) **Mounting Set to cut to size - comes with:** 1.2 metre rails / rod, 8 end bracket EBA-2, 4 support bracket SUBA-3, and screws and nuts

MAMM- Mounting Sets:

MAMM's are the same length as the MAM (i.e MAMM-12 is the same length as a MAM-12), but it has provision for a Lockout Arm every 9mm.

MAMM's are to be used where 1/2 modules (9mm Aux contacts or similiar) and/or 27mm wide modules are used in a board.

EXAMPLE #1 - For one row of 24 x standard 18mm wide modules a MAM-24 is required.

EXAMPLE #2 - For one row of 24 x 27mm wide modules you need to convert the 27mm modules to 18mm IE 24 poles x 27mm = 648mm. Divide 648 by 18mm = 36 poles, therefore a MAMM-36 is required.

If in doubt please call 07-54452910 and ask for technical support. We will be happy to help!

DID YOU KNOW?

We invented the Cirlock System in 1992 and have been making it on-site at our factory in Queensland ever since.

The lockout arm range is ever expanding as we keep up to date with the new Circuit Breakers entering the market.

Lockout Devices for Fuse Holder

APPLICATION:

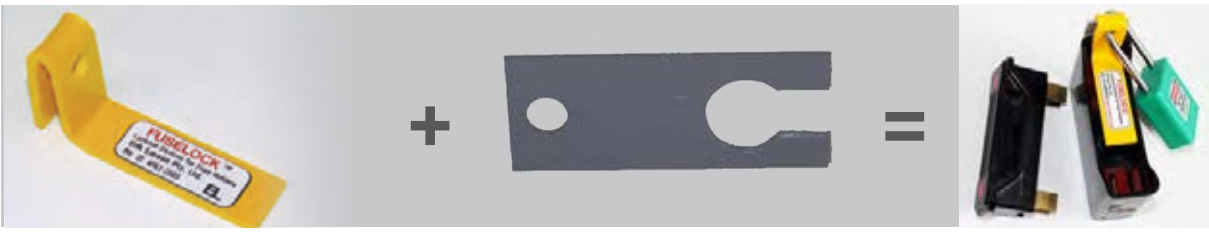
The FUSELOCK System is a unique system of Lockout Devices for Fuse Holders, that can, when properly installed and used, help to prevent un-intended insertion of fuse links in fuse holders. The system consist of basically two parts:

A LOCKOUT BASE to be permanently attached to the fuse holder. There are four basic different types - see below for details - and a LOCKOUT ARM to be inserted when locking out is required.

The parts are manufactured from rigid and expanded PVC Plastic. Padlock holes size are 8 mm.

FUSELOCK System is available for a wide range of fuse holders.

The FUSELOCK System consist of two parts:



Lockout Arm
To be inserted when locking out is required. The 2 sizes avaiable locks most types/sizes fuse holders.

Lockout Base
Four different basic shapes/types available. To be permanently attached to the fuse holder.

Lockout Bases - available in 4 different shapes

Part No.	Description
Type 'A'	For frontwired type fuse holders. For fastening on the fuse holder with the attached VHB tape. Can be installed while fuse holder is in service.
Type 'B'	For backwired type fuse holders. For fastening on the fuse holder with the attachged VHB tape. Can be installed while fuse holder is in service.
Type 'C'	For frontwired type fuse holders. For fastening behind the fuse holder. Wiring must be disconnected during installation.
Type 'D'	For front or back wired type fuse holder. For fastening on fuse holders mounting plate with screws or rivets.
LFA-1	For most fuse holders size 20 - 63 Amp
LFA-2	For most fuse holder size 100 - 400 Amp
LSB-1	Storage Brackets for LFA-1 & 2 when not in use. Can be mounted inside panels. Will hold either 7 LFA-1 or 3 LFA-2.

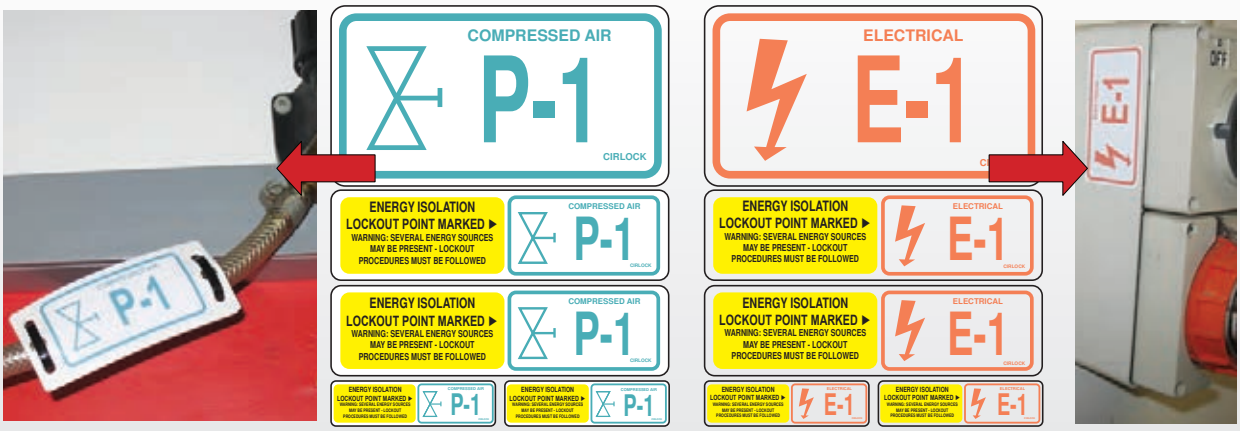
ENERGY SOURCE LABEL KIT

How to use:

Make it simple for all employees to identify HOW and WHERE to isolate ALL energy sources for machinery in the workshop, factory or on site.

STEP 1

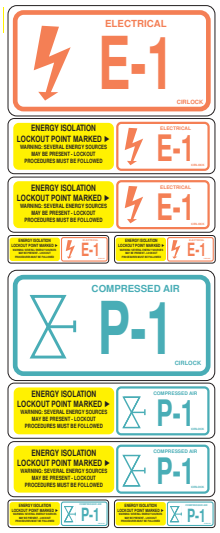
Place ID label on all Energy Isolation Points - ie Valves or switches that supply energy/power to the machinery.



STEP 2

Place the smaller matching label on Machine / Equipment

More information:



Place this large label on Energy Isolation Point

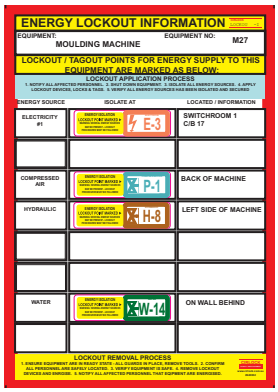
Place these smaller labels on Machine / Equipment

Place this large label on Energy Isolation Point

Place these smaller labels on Machine / Equipment

All Markers come with 4 relations markers in 2 different sizes. Large Marker is placed on or near Energy Lockout Point, i.e. Electrical Switches or Pressure Valves.

Smaller machines: Small Relation Markers are placed on machine or equipment for easy recognition of Lockout Points.
Larger equipment: On large equipment or machines, it is recommended to use Energy Information Lockout Label Chart in either A4 or A6 format. Relation Markers are placed on Lockout label chart in relevant positions. Additional information can also be added.



Information can be added with printed out labels or written directly with pen or marker. Un-used energy names can be blanked out with supplied extra labels. Apply clear protective over laminate.

Lockout Label Chart

Place on or near Equipment.
Attach Energy Source labels and other information as needed.

Available in A4 size Poster or as Adhesive Label (100x150mm)

ABOUT OUR SIGNS AND LABELS

Cirlock Self Adhesive Labels are made from High Quality 3M Vinyl printed with Eco Friendly ink with an outdoor average lifespan of 2-3 years.

All labels, signs and Pipe ID Markers can be coated with a clear laminate for excellent UV protection and extra long life.

Danger Tags, Warning Tags and other custom made tags are as standard made from High Quality Poly material, to withstand water and grease, and for long term durability. For re-usable tags extra thick material or heavy duty lamination can be used. All tags have as standard a 8mm metal eyelet. Please request other options if neede (eg string).

Signs can be supplied with either Polypropylene backing (1.4mm), Coreflute (5mm) or a Metal backing (0.55mm) as standard.

Cirlock signs, labels and markers are, where possible, made to Australian Standards.

Custom Tags

We can supply custom made tags in small and large quantities. Designed and printed in-house allowing us full control to supply exactly what you need - whether it be a simple Danger Tag with your company logo, or a more complicated tag in different languages. We can also supply tags with perforated sections, and layered tags. See page 89 for the ordering form, or download from our website (Home page, support tab)

I'M POPULAR

Need a sign in a hurry? For your convenience we have marked our most popular signs - these signs will (under normal circumstances) be available for immediate dispatch.

Custom Signs - Fast and Easy

We specialise in Custom Made signs for all applications. We have a simple and easy process from ordering to artwork approval to print.

We pride ourselves on our very fast delivery times as well as the high quality of our work and products.

Simply contact print@cirlock.com.au, or complete the Custom Order form on page 87.

Switchboard Labels

We can supply you with all your switchboard and other labelling requirements.
Traffolyte signs and labels were very popular in the past. However, phenolic dust is now recognized as a health hazard (castergenic properties) and so other abs safe plastics have been manufactured to deliver same and better results using new and improved modern safe formulas.
We use only high quality ABS plastics.
See page 88 for ordering form.

SWITCHBOARD LABELS

Need Switchboard Labels? Contact us now, fast delivery!

We can supply you with all your switchboard and other labelling requirements. Traffolyte signs and labels were very popular in the past. However, phenolic dust is now recognized as a health hazard (castergenic properties) and so other ABS safe plastics have been manufactured to deliver same and better results using new and improved modern safe formulas. We use only high quality ABS plastics with high quality 3M Adheisve.

PIPE ID MARKERS

Pipe Markers help to quickly and easily identify pipes contents. This is especially helpful in an emergency situation. It also saves time during maintenance. Australian Standard AS 1345-1995 - "Identification of the contents of pipes, conduits and ducts" - specifies guidelines for pipe marking. CIRTAG® standard Pipe Markers complies to AS 1345-1995 Standards.

Pipe Marker Layout:

A marker consists of printed text on a coloured background with a contrasting border and a chevron to show flow direction. The colours are determined by the pipes contents. Text and marker sizes are also specified.
Markers must be placed adjacent to all junctions, valves, wall penetrations etc. Markers shall be spaced no more than 8m apart, except for long uninterrupted straight runs of external services where spacing shall not exceed 50m.

Supplementary Colour Markers:

Additional colour markers can be used as 'wrap around' bands to help specify pipe content and danger levels.

Self Adhesive Pipe Markers

Pipe Markers are made from a Premium Grade self adhesive indoor/outdoor Vinyl. Simply peel marker off the release coated backing paper and press the marker in place. Weather resistant ink provide years of performance. It is recommended to Band each end with Supplementary Markers, Arrow Tape or Warning Tape.

We can supply you with all your switchboard and other labelling requirements. Traffolyte signs and labels were very popular in the past. However, phenolic dust is now recognized as a health hazard (castergenic properties) and so other ABS safe plastics have been manufactured to deliver same and better results using new and improved modern safe formulas. We use only high quality ABS plastics with high quality 3M Adheisve.

An Excel Spreadsheet is available on our website for larger quotes/ orders - pleas see the Home page under the heading SUPPORT.

DID YOU KNOW ?

All our switchboard labels (including solar labelling) is made right here on the Sunshine Coast, Queensland.

NOTES:

TERMS AND CONDITIONS OF SALE

1. General – These Conditions of Sale apply to the sale of items and equipment included in the current issues of the Cirlock Pty Ltd (the Company) price lists, or where a quotation is made, they shall form part of that quotation. No variation or cancellation of any of these Conditions of Sale shall be binding on the Company, unless assented to by the Company in writing.
2. Acceptance – A quotation is not to be construed as an offer or obligation to sell, and the Company reserves the right to accept or reject any orders received. The buyer shall be deemed to have accepted the goods to be of the description, quality and quantity ordered, unless particulars of a claim to the contrary are notified to the Company in writing within 14 days after delivery.
3. Prices & Delivery – All prices are in Australian Dollars unless otherwise stated, are subject to change without notice, and all orders are accepted by the Company on the condition that they will be invoiced at the prices ruling at the date of dispatch. All prices are strictly net unless where otherwise stated.Goods are sold on a Free on Transport (FOT) basis. Where the purchaser requires freight to be prepaid, all expenses will be to their account at cost.All prices shown in published catalogues or price lists are recommended selling prices only, and there is no obligation on the part of any reseller to maintain the same prices. The quotation includes only such goods as specified in it. Goods offered ex stock are subject to prior sale and delivery time quoted is without engagement.
4. GST – Goods and Services tax (GST), if applicable, shall be to the Buyers account. When added, GST is based on the rate and method of assessment ruling at the date of invoice.
5. Terms of payment – Payment for all goods purchased shall be net and be made within the timeframe stated on the Tax Invoice relevant to the purchase. Under no circumstances shall payments be made later than 30 days from the end of the month of the date on the Tax Invoice. Accounts may be placed on stop supply without notice if payment is not received by the due date. The Company reserves the right to charge interest on any overdue account.Payment for any Goods or Service must be received in full, before goods are dispatched, inside or outside Australia, if the buyer is not a registered Company in Australia.The Company reserves the right to not dispatch any goods before any outstanding payment has been received in full, from any person or company.
6. Return of Goods & Credits – Standard products as listed in the published price lists of the Company, may be returned for credit, provided the goods are returned within 14 days of delivery in an unspoiled, undamaged and re-saleable condition, in their original packing, free to the Company's warehouse.Goods will not be accepted for return after 14 days from date of delivery unless by prior arrangement, and with the payment of a restocking fee of 15% of original net invoice value.
7. Indemnity – The purchaser must comply with all instructions of the Company in relation to the fitting, installation and use of the goods. Notwithstanding such compliance. The purchaser must keep the Company indemnified against all claims expenses and liabilities of whatever nature including claims for death, personal injury, damage to property, and consequential loss, including loss of profit, which may be made against the Company, unless the same is directly and solely attributable to any breach of contract or by negligence of the Company or its authorized employees.
8. Property and Risk – All risk in the goods passes to the buyer upon delivery, but property in the goods remains with the Company until all debts owing to the Company by the buyer (including payment for the goods) has been made in full.
9. Limitations of Conditions – These terms and conditions, and the parties' rights and obligations under them, are governed by, construed and enforced in all respects by the laws of Queensland.
10. Warranties – Subject to any written warranty given by Cirlock, and subject to any statutory warranties express or implied which by law cannot be executed, all warranties, conditions and representations, express or implied are expressly negated. In the case of Goods, where a warranty or condition is implied by law, Cirlock's liability, to the extent it can be limited, is limited to one of the following at the election of Cirlock:
    i. Replacement of the Goods or supply of equivalent Goods
    ii. Repair of Goods
    iii. Payment of the cost of replacing the Goods or acquiring equivalent Goods
    iv. Payment of the cost of having the Goods repaired.
