Description

Combat heat stress with the only small, compact, low cost and portable Arm Immersion cooling product on the market.

Studies have shown the forearm immersion in temperate water is more effective in lowering core body temperature than passive cooling, mist sprays or cooling vests.

This patented Harcor Arm Cooler Harness has been designed and developed by Fire Fighters for Fire Fighters.

FEATURES INCLUDE:

- Extremely small and compact when rolled up and folded away
- Can be used almost anywhere, sitting in a chair, leaning up against wall/tree etc
- Reinforced base resists wear and tear
- Padded neck strap
- Adjustable webbing strap allows the harness to be adjusted to anyone's size
- Easy to install and remove plastic bags provide a hygienically clean harness after each use
